

Carlos Pineda-Antunez

Curriculum Vitae

Updated June 2026

Carlos Pineda-Antunez

PhD student in Health Economics and Outcomes Research
Comparative Health Outcomes, Policy, and Economics Institute, University of Washington
cpinedaa@uw.edu carlospiant.github.io [GitHub](#) [LinkedIn](#) [Google Scholar](#) [ORCID](#)

Research Profile

Health economist and decision scientist focused on health economics, outcomes research, decision modeling, and public health policy. My work evaluates prevention interventions, health system performance, and the value of health technologies, with applications in colorectal cancer, HIV, maternal health, mental health, and financial protection. I develop decision models, simulation tools, economic evaluations, and reproducible software workflows to support evidence-informed decision making.

Education

- Ph.D in Health Economics & Outcomes Research, University of Washington, 2027
- M.S. in Health Economics, National Institutes of Public Health, 2015
- B.S. in Biomedical Engineering , National Polytechnic Institute, 2011

Professional Experience

2025 - current: Stanford University, California, US Decision Modeler, Department of Health Policy, School of Medicine.

2025-2026: University of Washington, Washington, US Teaching assistant at the Data Science in Health and Outcomes Research Certificate Program, The Comparative Health Outcomes, Policy, and Economics Institute, School of Pharmacy.

2024-2025: University of Minnesota, Minneapolis, US Health Economist, Division of Health Policy and Management, School of Public Health.

2024-2025: University of Washington, Washington, US Health Economist, The Comparative Health Outcomes, Policy, and Economics Institute, School of Pharmacy.

2024 (June - September): Stanford University, California, US Decision Modeler, Department of Health Policy, School of Medicine.

2022 – 2024: Health Research Consortium (CISIDAT), Morelos, Mexico Decision scientist, Division of quantitative methods

2021 – 2022: Center for Research and Teaching in Economics (CIDE) Mexico City, Mexico Decision Modeler, Division of Public Administration

2015 – 2021: National Institute of Public Health (INSP), Morelos, Mexico Health economist, Division of Health Economics and Health Systems Innovations

Software Development and Published Tools

BayCANN for CISNET colorectal cancer models

Code to perform emulator-based Bayesian calibration for the three Colorectal Cancer CISNET models. Publication: [Medical Decision Making](#). Repository: [NCI-CISNET-Colorectal/baycann_cisnet_crc](#).

Cancer modeling with discrete-event simulation

Tutorial and open-source workflow for cancer modeling with discrete-event simulation. Publication: [PharmacoEconomics](#). Repository: [sjpi22/tutorial_cancer_modeling_des](#).

ggpop

R package built on top of ggplot2 to simplify the creation of icon-based population charts. CRAN page: [ggpop](#). Project website: [jurjoraa.github.io/ggpop](#).

Talks

- 2024. Quantifying the value of a potential new diagnostic test in the context of imperfect adherence. Conference presentation, Society for Medical Decision Making Annual Meeting, Boston, MA, USA.
- 2024. Fragmentation of health systems and maternal mortality transition in Mexico, 2000-2021. Conference presentation, Health Systems Global, Mexico City, Mexico.
- 2023. Optimizing a natural history simulation model of colorectal cancer using GPUs. Conference presentation, Society for Medical Decision Making Annual Meeting, Philadelphia, PA, USA.
- 2022. Emulator-based Bayesian calibration of CISNET colorectal cancer models. Poster and oral presentation, Society for Medical Decision Making Annual Meeting, Seattle, WA, USA.
- 2021. The Economic Impact of COVID-19 Non-Pharmaceutical Interventions and the influence of Poverty and Inequality. Oral presentation, International Health Economics Association, Virtual congress.
- 2020. Policy, poverty, and politics: How public health, inequality and political leadership interacted in the COVID-19 pandemic. Conference presentation, IAS COVID-19 Conference, San Francisco, CA, USA.
- 2019. Exploring the intervention costs of PMTCT and HTC: explaining and predicting unit costs for implementation scenarios using pooled data from several studies. Conference presentation, International Health Economics Association, Basel, Switzerland.
- 2018. Filling in the gaps: Analysis of VMMC unit costs using aggregated (facility-level) primary data from several studies. Conference presentation, International AIDS Conference, Amsterdam, Netherlands.

Teaching

- 2026. **Course Master, CHOICE Grad Seminar**. University of Washington, Seattle, WA, USA. Service period: March 2026-June 2026.
- 2026. **Guest lecturer, Advanced Methods in Economic and Outcomes Evaluation in Health and Medicine**. University of Washington, Seattle, WA, USA. Guest lecture delivered in February 2026.
- 2025. **Teaching assistant, Data Science in Health Economics and Outcomes Research Certificate Program**. University of Washington, Seattle, WA, USA. Service period: September 2025-June 2026.

- 2021. **Teaching assistant, Health economics, Master of Health Policy and Health Systems.** National Institute of Public Health, Morelos, Mexico.
- 2020. **Teaching assistant, Economic evaluation of health programs, Master of Health Economics.** National Institute of Public Health, Morelos, Mexico.
- 2019. **Teaching assistant, Workshop on Transparency and Reproducible Research.** National Institute of Public Health, Morelos, Mexico.
- 2016. **Member of the health economics faculty master's program committee.** National Institute of Public Health, Morelos, Mexico. Service period: 2016-2021.

Awards

2023, Rubenstein Endowed Memorial Scholarship, University of Washington.

2023, Graduate School Top Scholar Fellowship, University of Washington.

2023, Mexico's CONACyT Graduate Fellowship for pursuing a PhD program abroad.

2022, SMDM Lee B. Lusted Student Prize finalist in Quantitative Methods and Theoretical Developments for an outstanding presentation.

2015, Thesis honorable mention by the academic department of the INSP.

2013, Mexico's CONACyT Graduate Fellowship for Masters Studies.

2009, Acknowledge of academic excellence in undergraduate studies in biomedical engineering.

Skills

- Cost-effectiveness analysis
 - Incremental cost-effectiveness ratio
 - Value of information analysis
 - Budget impact analysis
 - Probabilistic sensitivity analysis
- Health Decision models
 - Markov models
 - Microsimulation models
 - Dynamic transmission models
 - Discrete event simulation
 - Decision trees
 - Partitioned survival models
 - Meta-modeling
- Impact evaluation
 - Causal inference
 - Quasi-experimental methods
 - Machine learning for impact evaluation
- Cost analysis
 - Microcosting
 - Cost estimation
 - Impact budgeting
- Evidence synthesis
 - Systematic reviews
 - Meta-analysis
 - Network meta-analysis
- Artificial Intelligence
 - Deep learning
 - Generative AI
